Laura Dang

lauradang.github.io • laura-dang • lauradang • lydang@uwaterloo.ca

SKILLS

Languages: Python, C++, Bash, SQL, HTML, CSS

Technologies: Docker, Kubernetes, Helm, MySQL, MongoDB, Linux, Jenkins, Grafana, Jira, Git

Frameworks: Flask, PyTorch, Keras, Kubeflow, MLflow

Cloud Services: Azure (AKS, AAD, Blob Storage, ML), AWS (EKS, EC2, ES, S3), IBM Cloud (IKS)

WORK EXPERIENCE

Nuro – Software Engineer (Site Reliability Engineering)   Mountain View, CA | May. 2022 – Aug. 2022

- Expanding & supporting production vehicle data center infrastructure, storage, and networking systems

NVIDIA – Machine Learning Software Platform Architect   Santa Clara, CA | Jan. 2022 – Apr. 2022

- Developing NVIDIA's 1st generation Machine Learning as a Service (MLaaS) Platform

IBM – Machine Learning Infrastructure Engineer   Calgary, AB | May 2021 – Aug. 2021

- Built scalable end-to-end **K8s** system to automate ML workflows & optimize ML investments for enterprise clients
- Used **scikit-learn, Kubeflow,** & **MLflow** to create pipeline with parallelized preprocessing & model training stages
- Developed CI/CD system to automate model deployment on **ACI** & **AKS** using **Azure ML**, **Seldon Core, GoCD,** & **Jinja**
- Created ML monitoring system to track feedback, outliers, & request rate/latency using **Prometheus** & **Grafana**

Molex – Software Developer (DevOps & Machine Learning)   Waterloo, ON | Sept. 2020 – Dec. 2020

- Revamped **Python** pipelines to stream team stats to **InfluxDB, MySQL,** & **Grafana,** improving test coverage by **27%**
- Integrated **DeepSORT** tracking algorithm into **Tensorflow** 3D object detector to safeguard industrial danger zones
- Led creation of centralized **Jenkins** logging system by deploying **AWS Elasticsearch/Kibana** & **Splunk** with VPCs

Soapbox Innovations – Machine Learning Engineer   Toronto, ON | Jan. 2020 – Apr. 2020

- Developed REST API using **Flask, MySQL, Docker,** & **Gunicorn** to provide ML web services for 100 000+ users
- Built **cron**-scheduled ETL pipeline to dynamically retrain **fast.ai** models on unique client data & upload to **AWS S3**

GrantMatch – Junior Software Developer   Oakville, ON | May 2019 – July 2020

- Implemented full-stack web app features **(Django, Laravel, Vue.js)** to assist securing government funding for clients

PROJECTS

Automatic Black & White Image Colorizer 🔗   Apr. 2020

- Built & trained **PyTorch** encoder-decoder **convolutional neural network** to colorize grayscale images

BehaviourStack – RyersonHacks Winner (Track Challenge) 🔗   Sept. 2019

- Created tool that collects demographics of advertisement's audience using **ResNet** model & **OpenCV** in real-time

EDUCATION

University of Waterloo   Sept. 2018 – Apr. 2023

Candidate for **Bachelor of Mathematics,** Double Major in **Statistics & Computational Math**, Minor in **Computing**

- **Honours:** Dean's Honors List (Spring 2020)
